## COVERWOR'S MESSAGE. An and House of Representatives of the Ca wealth of Pennsylvania.

shedience to the authority vested in the mee, by the tenth section of the ist article to Constitution of Pennsylvania, I have and it my duty to convene you at this early

public works, until the contemplated more personnell lines should be negotiated. The amount is he is reviewed by the governor, it was prayed by law, should be paid within an mon his after the passage of the ant of April 22d, 1829, from the passage of the ant of April 22d, 1829, from the masse which is no expected would be about more than the masse which is no expected would be about more than the masse which is a month to the commissioner. It while amount of masses obtained, as a more permanent from, by the commissioner of 2,300,800 which the legislature authorised to be because of police which should be laid down, for its fewer of the provent of the provent by the governor. At an earlier and the present has the present before the same of the loans of the loans

high fashion and volgatity there is often less the last month. The canal commissioners, by then a step. Good rease, grave, and true breeding, his between. The lady occupied one of those an additional temporary loan of \$190,000 because of the last month. The canal commissioners, by the set of 22d April cattering, his property loans of \$190,000 because of the loan authorized by the set of 22d April cattering to the Pennsylvania canal and

had the loan authorized by the set of 224 April plans, "relative to the Pennsylvania canal and plans and read," should be negotiated to be applied to certain designated diversion of the casal and rail cased. In a recordance with the request in that recolumns, I have obtained \$190,000, and placed it in the hands of the commissioner of the infamal languagement, find, to be a pipiled to the divisions of the canal and fail 700d, designations. the divisions of the canal and rail 7030, deep ted in the resolution of the board of canal minimum. This lean has been negotiated the same terms with the other temporary is The necessity of continuing the operations upon The necessity of continuing the operations upon the canal and rail road, and in some instances of securing the works against the danger of re-riess injury during the approaching a inter, will. I trust, render the generaty of this measure suf-ficiently apparent; I therefore submit it to the ficiently apparent; I therefore submit it to the logalistum to provide for the payment of this sam, together with the other temporary loans. The correspondence with the banks making this loan, will be submitted to the logislature, from which will be seen the terms upon which it has been segotiated, and the time of its repayment. The money obtained under the act of April 22d, 1829, would have been amply sufficient to most all the demands of the Canal Commissionars to the present time, if the vouclors aft consequent drafts in the Transary of some of the acting thank Commissioners in June 10st, bad not

ers to the present time, if the vosciors and consequent drafts in the Transary of some of the acsing thans! Commissioners in June 1st, had not
greatly exceeded, what had been usual or was
espected. The reasons shy the proposed lose
fished, have been variously stated, and appear to
have originated from such diversified and remote
causes that the detail would be unproductive of
advantage. How far the restrictions as to the
rate of interest, or the particular mode directed
by law for disposing of the lose, operated on the
money londers, it might be desirable to a vertain
if it ners, only to solve the problem, that the
comel stock of a neighboring state commands a
premium abroad, while that of this, so less wealthy. Commonwealth is in no demand and will
not self at par. Has the provision, that the
amount of the loan, not subscribed for at a given
time, should be put up at public auction, and
the fact that it was so put up and did not obtain
own a bid, had any, and if any, what matent of
influence on the credit of the state! It may here
be proper to state, that no doubt is entertained, isoluence on the credit of the state! It may her be proper to state, that no doubt is entertained that whatever funds shall be required to complete the canals and rail reads under contract, can he had on the most favorable terms, if the resource of the Commonwealth shall be made to flow in to the treasury in such abundance as shall inspire perfect confidence in the londer that his interes-uill at all times be most cally and, at the time to the transity in such abundance as a shall impore perfect confidence in the lender that his indexes will at all times be punctually paid, at the times for that purpose regularly fixed. No duty is more hesperative or pressing on the general assembly, that that which is here adverted to. It would be unjust as well as impolition, not to maken whether the friendly dispositions manifested by many of our monied institutions, in their effects to obtain the sums wanted to enable the Board of Canal Commissioners to prosecute the work entrasted to their, care so successfully as to have now 127 miles of Canal in actual operation, vis. 75 miles from Pittsburg to Blairwille; I miles from Lewistown to the mouth of the Janiata; 37 miles from Northumbarland to the Janiate river; and 24 miles from the mouth of that river to Middletown, are believed to be in complete navigable order, except the acqueduct at the Juniata. The routes now in operation were so for fiftshad under the late bears of Canal Commissioners, that the present Board had at the Juniata. The routes now in operation were so far fifthed under the late board of Canal Commissioners, that the present Board had the gratification of early having them filled with water and ascertaining that the banks, excavations, the locks and bridges, were of such solidity and workmenship, that the boats performed ships trips without delay or difficulty, other than such as appertain to the best executed works of such magnitude. The expectation is still confidently entertained that early in the next summer there will not be less than 400 miles of the Pennsylvania Canat in full operation. When to this extent of inland navigation is added that which is afforded by the Schuylkill and Lehigh canals, we have much cause to be preud of the public spirited exertions of our constituted authorities and fellow citizens, and to hope that prinsperity and wealth will flow in upon us abundantly, to stimulate our industry to the unmost, and bring to market the mineral and metalic treasures which are now buried and useles. The completion of the Chesapaake and Delaware Canal is an event of too much moment not to call forth our liveliest congratulations.

The report of the Board of Canal Committoners and of the Directors of the Schuylk sioners and of the Directors of the Schuylkill and Lahigs Navigation companies will place before the Legislature all the facts necessary to a thorough suderstanding of the present condi-tion of our canals and rail roads. The present is absolvence to the authority vasted in the general, by the tenth section of the lust rities the Commentation of Pennsylvania, I have been did not described in my day in convence you at this early day; a principal reason why you have been the been these cased, was set forth in the proclamation under which you have ascembled, in order that the subject which would demand your earliest attention, might previously so occurpy your thoughts, that you would come to the reat of graveragent with all the information required and he prepared to act which as hittle delay as possible. The previously concerns, the income and aspenditures of the commonwealth, its delay as possible. The previously concerns, the income and aspenditures of the commonwealth, its delay as greatly and amperatively subjected the yant cleasest cash instance, and call for the most calleghand legislation and disposition, at a time whom her engagements in great public works, as yet comparatively unpreductive, demand an extension of her credit, and trujucit, that ample provision be made for the payment described the substitution of the roads. These wastes, as yet comparatively unpreductive, demand an extension of her credit, and trujucit that ample provision be made for the payment of the contraction of the roads, have the middle to those with the state of the comparatively unpreductive, demand an extension of her credit, and trujucit that ample provision be made for the payment of the contraction of the roads, have been distanced as perfectly the unpreduced of the contraction of the roads of creditions of the contraction of the roads of credition

check caused by the failure of the late loss, will impose upon the Legislature, a deliberate reconsideration of all that has been does in reliation to infernal improvement. That sixth a reconsideration will produce wine measured and happy consequences hardly admits of a doubt.

doubt.

An application may be expected from the stock hothers for a research of the chatter of the flank of Pennsylvania. The large amount of succh in that incittition comed by the state will, whatever objections may be urged, require that no step in relation to it shall be taken, extended the statem of the content of t that no step in relation to it shell be taken, except upon instare advisement. If the General Assembly shell regard the investment of the public money as a profitable one, and regard the Benk with a favourable eye in reference to granting it a new charler, a close evision of the one is now enjoys, will come fairly under consideration, and also, the introduction into it of such medifications as experience may

suggest as likely to usue in annual supercommunity.

Applications for divorces to the Legislature become every year more numerous, and of necessity consume in the investigation of the time, which might profitably be bestowed on the business of the public. In some case: it is feared that application is made to the Legislature and acted upon without sufficient avidence that the party complained against has been that the party complained against has been ture and acted upon without that the party complained against has been duly notified of the application intended.—Would not all the ends of justice likely to be obtained by the granting of divorces be more certainly attained, if the jurisdiction of our courts were more extended over them, and the cause of divorce more fully defined than at pre-

cause of divorce more fully defined than at present.

The right to beer arms is another important
right guaranteed to all our citizons by the constitution. The right thus guaranteed, seems to
me, to impose upon the Legislatura the duty of
no organizing and disciplining the whole body of
the citizens, that they shall be able, not only
to bear arms, but to use them with confidence
and skill, "in defence of themselves and the
State." If such a necessity shall arise. I think,
therefore, avery encouragement should be given
to our volunteer corps. Let the Legislature
not forget that the great body of the people,
their constituents, constitute the militis, and
claim that such a law may be passed as shall
make them what they ought to be, the pride
and strength of their country, and its sure defeaders against appression at home, or invasion

make them what they ought to be, the pride and strength of their country, and its sure defenders against oppression at home, or invasion from sbroad.

The importance of giving publicity with as little dalay as possible, to the decisions of the Supreme Court, is sufficiently obvious. It seems to be considered that prefits to be derived from the publication of reports of decisions, will hardly compensate for the Jahor and expense to be incurred in preparing and publishing them. I would therefore resommend, that provision be made by law for the employment of a reporter By a small tax on writs of error, which could not operate oppressively on any one, a fund not operate opprossively on any one, a fund might be provided for the payment of the re-

not operate oppressively on any one, a fund might be provided for the payment of the reporter.

If I am not much mis-informed as to the operation of the laws which gow regulate the relations between Landlords and Tenants, they loudly call for the benefits of revision and consolidation. This is more especially the case in our cities and largo towns, where a large preportion of the homes are rented? I recommend in an especial manner that a prompt and cheap remedy be devised, by which Tenants shall be compelled to surronder up possession when required so to do, at the end of the period for which the premises shall have been demised.—The Act of the 25th of March, 1825, which was intenfied to remedy this evil in the city and county of Philadelphia, is complained of as almost wholly inoperative, as the Tenant must voluntarily have remeved from the premises, before the Landlords can have a writ of possession issued. How for the peculiar power vested in Landlords for the securing of their rents is founded in justice, or derived from the ancient laws of England, and adopted without sofficing examination, is a matter not unworthy to occupy a portion of the time of the General Assembly. There are some subjects of deep and general importance which press upon the mind of the Governor, and which he has more than once submitted to the Representatives of the people, but which have not yet commanded that portion of Legislative consideration to which he thinks them entitled. To some of these topics he would even now in a few words solicit attention.

pics he would even now in a few words solicit attention.

There is no provision in our truly excellent constitution of a more imperative character, than that which declares "that the Legislature shall, as soon as conveniently may be, previde by law for the establishment of schools in such manner that the poor may be taught gratis."—

Have such schools been established? I think not, and thus thinking, I again call it to momery, and urge it upon you as a duty, the performance of which will do you honour and shower down blessings upon the Commonwealth.

The "free and equal" exercise of the right of suffrage is secured by the constitution to every qualified citizen, but it is smech doubted whether provision has been made by law to make good that which is guaranteed by the constitution.—

The construction of the qualification requisite is different in one county, and even in one township of the same county from what is in another. The neglect or design of an american or tax collector may exclude a citizen from the poil in one district although it will not exclude him in another, some legislative enactment making clear the duties of election officers, and ensuring greater uniformity in their decisions would do much towards ensuring the correct exercise of this precious right.

Abaut to retire frem the important office to

this precious right. About to retire from the important office to which I was called, and in which I have been continued by a large majority of my fellow citizens, I should but ill acquit myself to my own feelings, did I not seize upon the present, probably the last occasion which may offer, to reincrate the gratitude I have ever felt for the theory configred, and protest, in justice to myself, that I have in all things, according to my best industry. henor conferred, and protest, in justice to myself, that I have in all things, according to myself, that I have in all things, according to myself, that I have in all things, according to myself, the happiness of those by whom I have thusbeen honored, and to increase the prosperity of
my native state. I shall not now subject myself
to animadversion if I venture a suggestion is relation to the accommodation and deniity of the
future Chief Magistates of Pennsylvania: I am
persuaded that the adoption of the suggestion
about to be offered, would be of much advantige, not only in his relations and intercourse
with the Legislature, but in the prompt and
easy access it would affect him to the public
officers of the several heads of department, with the Legislature, but in the prompt and easy access it would afford him to the public officers of the several heads of department, thus facilitating his means and improving his opportunities, to take care that the laws shall be faithfully executed. Many of our sister states have eracted government houses adjacent to their Legislative halls, for their Chief Magiestrate to reside in; the Commonwealth of Pennsylvania has built elegant and capacious Legislative halls, and commediate public offices, near which are several suitables and hobbs size on

may still continue to watch over and protect un. To you my fellow citizens, collectively and in-dividually, I wish health and happiness. J. ANDREW SHULZE. Harrisburg, November 4th, 1829.

Montreal, Oct. 31.—We regret to beam by the Upper Canada papers that award to beam by the Upper Canada papers that award to be day constructed across the river Welland sinking nearly two feet, after its erection and deem completed, the waters of the Welland Canal assemble made of wifficient depth in some parts to admit of its unobstructed navigation. This will probably deprive the public of its advantages till next apring.—Concreat.

About eight months ago two young women, one named Mary Smith, the other Mary McCalling, were admitted into the Montreal General Hospital, they were immutes of the same wand, laboured under complaints somewhat similar, and manifested considerable sympathy for each other throughout their illness: they received the

and manifested considerable sympathy for each other throughout their illness: they received the rites of their shursh at the same time, and in all the course of their sufferings there was a considerable coincidence. Their diseases beffled every exertion to counteract their effects, and the approach of death became evident, their wishes of dying at the same time were often expressed, and it pleased Divino Providence that "in death they were not separated," for on Thursday last they expired within a few hours of each other.

PHILADELPHIA:

PRIDAY EVENING, NOV. 5, 1829.

The following letter, from a transporte onvict to the Governor of NEWGATE pri on, issuid, in the LONDON MORNING HERALD o have been published with the approbation fmost of the high judicial authorities in Lox oon; in hopes that it might work a salutary ffect, by tending to undecieve the many vretches who look forward, without terror, to a sentence of transportation. The writer is described as a young man of goo ducation, seduced into crime by a connexion with an unprincipled womans

tor is described as a young man of good education, seduced into crime by a connexion with an unprincipled woman:—

Respected Sex:—I have beard with great grief that Mesers.—, (his old employers) have been again plundered, and my name has again been brought before the public, as having relapsed into bad courses in this distant land. This information is totally incorrect. Immediately upon my landing, in October, 1827, my shipmates and I were assigned to settlere up the country. The master I was then assigned to fam still living with, and I can have his testimenials of good conduct under the Surgeon Superintendant's own hand, during my passage out, when I acted as his assistant. Mr. L.—— was very assiourfugain me some situation suitable to me, but the letters he wrote to the Secretary were neglected by the Chief Mate, who was to send them un shore; and I was in sensequence assigned to my present employer, as his Excellency had signed his name, and it could not be reversed, like the laws of the Medes and Persians. Thus, by the migligence of one man, I have become a settler's man. I do not diaguise truth from you; I have been notified to associate with the most depraved of human beings, my unster's men. Segurated from all hopes of comfert and enjoyment, debarred from all religious worship, I have been living 150 miles from Sydney, up the mountains, 40 miles from any church or settlement. I see no one from month to month but a black natives. The voice of prayer is never heard; all is blasphemy and wickedness—and although my master has latterly made me his house-servant, and places much confidence in the field at all kinds of tail, under a meridian sun; that I was been as latterly made me his hundred to compress or me as a modelment of the shell have been aseed to the service of the service of the service of the service o

learned to reap, to whear sheep, to fell timber, to burn it off, in short, I can do almost all laboritous work.

Thus, my kind, much-respected Sir, I have given you a slight sketch of my life. I am meet miserable and disappointed. I know my sentence, although severe, is just; yet I was in hopes that my occupation would have been more whose to my abilities. Is it, I sak, no punishment to be thus sent so many thousand miles from my native country? Gracious Ged! could rising youth but have a single glance of the prisoner in New South Wales he would surely shou the temptation to crime. The slightest effence provokes flogging; insolence is the grand bug-bear in the Golony: for this I have seen some men sent to an iron-gang, to work in chains, and be half famished, or tie-lup to receive the ignominious punishment of 50 or 75 lasher. With respect to liberty, it is a thing that fow now get possession of; a Lifer must serve eight years with one master, ten years with two, and one year additional for every additional master. The smile of bitterness comes over my face whilst write this; my Gon enable me to overcome this sensation. Why is a man debarred all chance of liberty whose conduct may be irreproachable? Much of the misery and crime committed by convicts may be attributed to the almost total extinction of his hopes of liberty. As to myself, I once thought of a mitigation, but all hopes are gone: I am like a piece of mechanism; my spirit is so much broken by disappointments and hardships, that I feel a dreadful spirit of indifspirit is so much broken by disappointments and hardships, that I feel a dreadful spirit of indif-ference creep upon me—my life appears a blank, and futurity is my only source of expectation.— One step slone appears before me: I shall con-sider of it twelve months, and then make my election.

The annexed article, on the subject of hydrophobia, has been published in several of the London papers; and some of the most respectable have recommended it to general attention, as if proceeding from a ource entitled to respect. We know not whether the remedy proposed is a new one; nor can we, of course, pretend to say what may he its worth. Its publication may be useful, and can certainly produce no evil; as the dreadful disease, to which it is said to have been applied, is not one of those for which even the ignorant undertake to practice on themselves: -" Nearly five years ago the writer of this communication was called to see a stout young man in the second day of his attack of the hydrophobia, and, being the first case he had ever seen (though he had enjoyed extensive practice as a physician for several years) he was much shocked at the harrid scene which presented itself .-The young man had been bitten by his own dog about four weeks previous to the attack of hydrophobia. He died the following day. Two other persons had been bitten at the same time by the same dog; they were much beautiful at witnessing the above mentioned was and they accordingly consulted the writer. He first allayed, as well as he could, their fears and apprehensions, and promised to do all he could for them. Reflecting that the can be pecies never show any sensible perspected, but, in lieu, when heated from whatever cause, they have uniformly a copious flow of saliva—reflecting for New Orleans, at the time of this sedies as could, their fears and apprehensions, and

origin, in all instances, from the bite of a model, or dying animal, which has been too at its death, the writer, holding these having, adopted the ables of platen, or rather placested parts from the were kept open by masses of Ung. The system was kept free by rients. The Pilulæ Hydrargyri of grants. grains were given to the extent of f to fifteen grains per diem, in order those glastis which in the carine show the peculiarity of their syste be for some time affected. This weeks, and about the end of that ti ulcers healed very kindly, the sabirs had been used the whole Those two individuals have confined enjoy good health. Not long after the writer was called to visit a refine young woman of about 17 or 18 of age. She had recently been hits mad dog, which was unknown by While she was feeding two y the dog, in passing, bit them both, both became mad, and were bill ngly by the proprietor. The writer her fears, requested a surgeon to bitten part, and blood her freely at whether once or twice the writer remember. Aperients were given days, and the same plan was follow the above detailed cases. The male has been in good health e It is indispensable that the gre ty should be given to every circu-connected with this disease, as it is heretofore the operables as it is heretofire the opprehim medi-from these hints, it is hoped that the be induced to canvas the subject-every thing the writer has observed of the unfortunates by me phatics, not by the red veins in manner, as in some other in observe, upon those persons while hitten very extensively upon the disease does not make its sooner cateris paribus, than 16

CHESNUT STREET TREATS as I have seen than both demonst at the recollect an instance of being demond a rant from either of them. This conveties not be credited by the tragic solutes of Q who generally prich themselves upon their roless, and call youlferstion energy nearly all that could be wished for in that rig character. It was certainly one of the most years. By chaste and classic, I do not meet an idea that it was soldily correct; so it was by vanting in spirit, and was fraught with unit and pathos. Of late I prefer this lady's trage comedy; and is it not natural to loss for a day gay to grans from the advanced in years? Sin gay to grave from the advanced in years? The men wanted mething but a grain more force in the performance to have made it perfect. He performs to the American stage deserves to be placed in comparison with this lady for her shift in commission. The test of the performers in the tragedy were tolerable; and I so fully of opinion that they would have been still defect they had known their parts; many of which again an arrive guessed at the whell reforestive registered. be merely guessed at, by their respective

the patient is more rapid."

The farce of the Married Backelor was p for the second time; and was an improvement on the brepre-entation, the performers being more perfect a what they had to do. Woon, WENTER, and Man ROWNOTHAM, were every thing that the most fastalise could have wished; and Miss Wanno was very class. This is one of the pleasantest of modern afterpieces, and This is one of the plenantest of modern afterpieces, all perhaps none was ever better played on any of or stages. Let the manager cost his one or two not place in the manner this was done, and he need never four of sending his audiences off in good hu inments. COLLEY CIBBER.

The New York Ganetic furnishes the following shittened particulars in relation to the melancholy brisist which cancel the death of Mrs. Milligan, at few tests on the 4th instanti—

"We understand that the body of the decessed bely has been removed to the house of Mr. Fuster, Berning green, and will be interred an Saturday next.

"We should be suspert on to oppeal of the humans everious of Mr. Sammel M. Warner, and-maker in Santrest, who exhibited a Phillanthropic faciling on the occasion, which does him hasting henor. To him is great measure, is to be attributed the reservey of the child, which he carried to his heams, and taking a last bed with him for several hours, warned it again held.

ife.
"The child, though of course ill, is present on The child, though of course its, so present of danger.

"We have soneword with an old gouthesses who the windows of the and assistant. He resided to deale to inclance, and complet the whole of the corrispose of his over the water, but to use his own arguments, the strength was no more than a chicken's. What me have been the facilities of the unbappy leastest of the failed, during the memoral it was passed on the odgs if the pier? What no innerent it was passed on the odgs if the pier? What no innerently of agang must have been realised in that drop of time?"

Mr. Sioman's Repetit. It appears from the report of the Bank Committee of the Vermont Legislature, that the amount of paper new in circulation by the several Banks of that State, is \$689,281. Specie and bill of other Banks, and deposits in Boston and New York, \$428,820.

According to the Lehigh Pioneer, during the week ending with the 31st of October, 993 tens of coat were shipped from Mauch Chimk, in 31 boats; making a total of 18,433 tone in 527 boats: from Mount Carbon, in the same week,

How to have Good Goes in the Spaing.

If your Cider is well me b, put into each barrel as soon as there is any appearance of formentation, half a pint of common nustard seed, and immediately bung up the barrel. The fermentation will stop—the cider will retain its original sweetness, and very soon become perfectly transparent.

Newburyport Herald.

Acarburyport Heraid.

It is generally reported and believed, in the theatrical circles, that a lady belonging to the Tremont company has recently received intelligence from England, stating that a decessed relative of her's in that country had left her preparity to the amount of about \$200,000. It may be added that the lady is married; and that the letters furnishing this intelligence have been seen by several of her friends.

Eing's printer, who died in Lesisma since without issue, left about tant relatives, some of whom in been difficult to find. By connecting the above facts, we do not wish to be understood as converging the idea to our readers that the lady referred to is one of the hoirs of Mr. Rec.

New York, Nov. 5.—Last evening, a child was run ever at the corase of Hudson and Morton. Streets, by a cartiman, who was passing at the core per root to its one our readers that the lady referred to is one of the hoirs of Mr. Rec.
